

All i3 classroom screens include a built-in Windows 11 computer called an **OPS module**. Use it when you need Windows-only software or a Windows classroom workflow.

Switch to the Windows 11 OPS module

1. Turn on the i3 screen.
2. Open the screen's **Home**, **Input**, or **Source** menu.
3. Select **OPS**, **PC**, or **Windows**.
4. Wait for Windows 11 to start.
5. Sign in using the account provided by ISB.

The exact input name may vary between classrooms.

Switch back to the i3 home screen

1. Save your work in Windows.
2. Open the i3 **Home**, **Input**, or **Source** menu.
3. Select the i3 home screen or Android/i3CONNECT Studio input.

Shut down Windows correctly

1. Select the **Start** button in Windows.
2. Select **Power**.
3. Select **Shut down**.
4. Wait until Windows has fully shut down.
5. Turn off the i3 screen if you are finished.

Do not switch off the screen while Windows is updating or shutting down.

If the OPS module does not appear

- Check that the i3 screen is turned on.
- Open the Input or Source menu again.

- Wait a few moments for the OPS module to start.
- Restart the screen.
- Contact ISB IT if OPS, PC, or Windows is not listed.

If Windows has no network connection

- Click on the wireless or the globe symbol next to the time, in the lower-right corner, and select the ISB network from the list.
- If it doesn't connect, please contact IT and provide the classroom number.

Revision #3
