

Connect to an Interactive Display using Miracast (CH, MS and HS)

Make sure that the Windows or Android device is connected to the ISB or the ISBConnect wireless network.

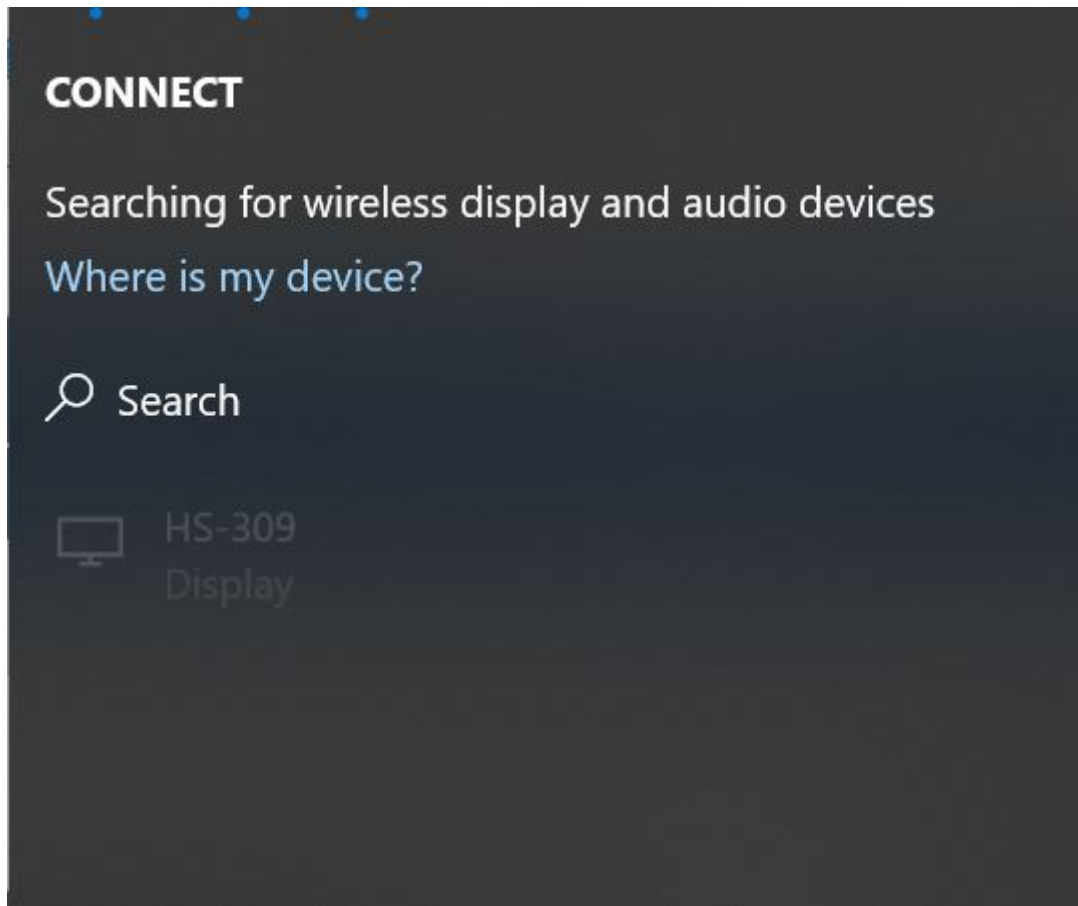

Turn on the interactive display (1), swipe up from the bottom of the screen using 2 fingers to raise the screen's menu (2), and select/switch to the HDMI 1 input (3).

Wait for this screen to show up

Press the  Windows button and K at the same time. In the list that pops up, find and connect to the correct device - in this case, HS-309. You should be ready to go.
