

Redirect calls to your voicemail

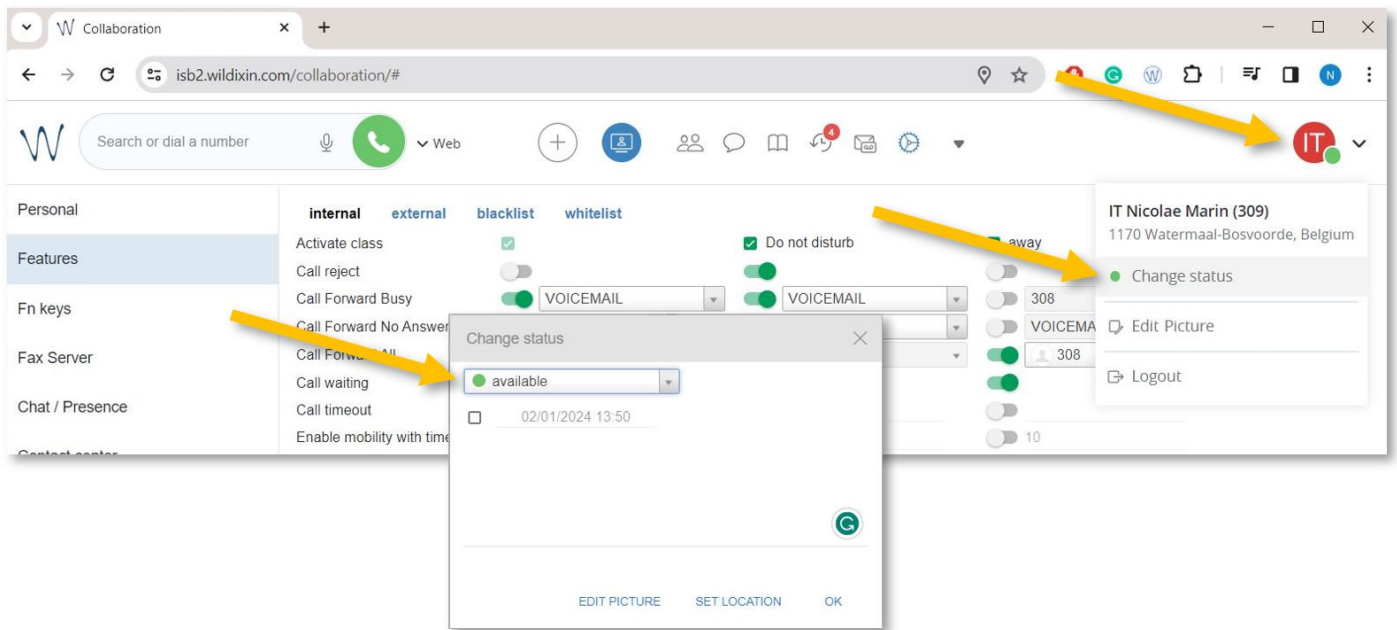

To activate the forwarding function while away from your office or on vacation, open <https://isb2.wildixin.com/collaboration/> login and go to settings.

Select the **Features** tab on the left and activate the **Do not disturb** class. Make sure that **Call reject** is off and turn on **Call Forward All - Voicemail** should be the default destination. Do not forget to press **Save**.

Important step. Change your status to **Do not disturb** to activate the new settings.

Click on your account bubble in the upper right and select **Change status**. In the pop-up window, change your status to **do not disturb**. Press **OK**.

Click [here](#) to learn how to listen to, manage, and/or set up your voicemail.
